## Overview

The Company changed its name from "Standard Silver Corporation" to "Texas Rare Earth Resources Corp." effective as of September 1, 2010. Our common stock is currently listed for quotation in the Pink Sheets, a centralized quotation service maintained by OTC Markets Inc. that collects and publishes market maker quotes for over-the-counter securities (PK:TRER).

The Company was incorporated in the State of Nevada in 1970. In July 2004, our articles of incorporation were amended and restated to increase the authorized capital to 25,000,000 common shares and, in April 2007, we effected a 1-for-2 reverse stock split. In September 2008, our articles of incorporation were further amended and restated to increase the authorized capital to 100,000,000 common shares with a par value of \$0.01 per share and to authorize 10,000,000 preferred shares with a par value of \$0.001 per share. The Company's fiscal year-end is August 31.

We are a mining company engaged in the business of the acquisition and development of mineral properties. We currently hold a twenty year lease, executed in August 2010, to explore and develop an 860 acre rare earth uranium-beryllium prospect located in Hudspeth County, Texas known as "Round Top" and prospecting permits covering an adjacent 9,345 acres. We also hold prospecting permits on certain other mineral properties located in Texas and New Mexico. We are currently not evaluating any additional prospects, and intend to focus the primarily on the development of our Round Top rare earth prospect. We currently have limited operations and have not established that our Round Top property contains any proven reserves or probable reserves. The strategic necessity of developing rare earth resources, the compelling fundamentals of uranium and the future potential for beryllium in the nuclear fuel cycle all present what we believe to be excellent opportunities for us.

We intend to (i) conduct a geologic, and radiometric study of the surface of the rhyolite to define areas where beryllium, rare earth minerals and thorium are concentrated in fractures, breccias or magmatic segregations, and to understand the distribution of uranium in this rock (ii) conduct radiation and geologic mapping underground to better define the distribution and habit of occurrence of the uranium, (iii) re-log drill samples that are stored on the property with emphasis on uranium and rare metal distribution (iv) conduct a sampling and laboratory examination program to determine the precise mineralogy of the rare elements in the rhyolite and (v) use these results to develop a drill program to test higher grade rare earth targets deeper in the rhyolite.

Because of the recurring losses, the Company will require additional working capital to fund its business operations. As of the date hereof, the Company is unable to quantify the amount of capital needed to fund its working capital needs after calendar 2011, nor is it able to quantify the amount of capital needed to develop the Round Top project. The amount of capital will be dependent upon the Company's business strategy to exploit the Round Top project. The Company intends to raise additional working capital through best efforts debt or equity financing. No assurance can be given that additional financing will be available, on terms acceptable to the Company. The Company's viability is contingent upon its ability to receive external financing. Failure to obtain sufficient working capital may result in management resorting to the sale of assets or otherwise curtailing operations

#### **Item 3. Quantitative and Qualitative Disclosures About Market Risk**

As smaller reporting company, as defined by Rule 229.10(f)(1), we are not required to provide the information required by this Item.

#### **Item 4. Controls and Procedures**

##### **(A) Evaluation of Disclosure Controls and Procedures**

The Company maintains disclosure controls and procedures designed to ensure that information required to be disclosed in reports filed under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized, accumulated and communicated to the Company's management, including its Chief Executive Officer ("CEO") and the Company's Interim Chief Financial Officer ("CFO"), as appropriate, to allow timely decisions regarding required disclosure.

As of the end of the period covered by this report, the Company's management carried out an evaluation, under the supervision and with the participation of the Company's CEO and CFO, of the effectiveness of the design and operation of the Company's system of disclosure controls and procedures pursuant to Rules 13a-15(e) and 15d-15(e) under the Exchange Act. Based on the material weaknesses described herein, the Company's CEO and CFO has concluded that the Company's disclosure controls and procedures were not effective, as of the date of that evaluation, for the purposes of recording, processing, summarizing and timely reporting of material information required to be disclosed in reports filed by the Company under the Exchange Act.

Because of its size, the Company did not have the resources necessary to hire full-time accounting personnel. On December 1, 2010, the Company hired a full-time CFO and employs the services of a contract bookkeeper. Because of the structure of our staff, we have a failure to maintain effective controls over the selection, application and monitoring of our accounting policies to assure that certain complex equity transactions are accounted for in accordance with generally accepted accounting principles.

##### **Material Weaknesses Identified**

We had significant deficiencies constituting material weaknesses as defined by the standards of the Public Company Accounting Oversight Board.

The material weaknesses identified were the lack of segregation of duties necessary to maintain proper checks and balances between functions and the lack of procedures to properly account for non-routine transactions.

The absence of qualified full time accounting personnel was a contributing factor to the problems identified. The specific circumstances giving rise to the weaknesses include utilizing the services of contract accountants on a part time basis in the absence of internal accounting personnel.

**Item 4. (Removed and Reserved)****Item 5. Other Information**

Between September 2009 and November 2010, the Company raised \$905,500 through the issuance of 2,263,750 shares of common stock and the issuance of Class A Warrants to purchase 2,263,750 shares of common stock and Class B Warrants to purchase 1,131,875 shares of common stock ("2009-2010 Private Placement"). Between December 2010 and January 2011, Class A Warrants to purchase 437,500 shares were exercised, and Class B Warrants to purchase 218,750 shares were exercised, resulting in \$382,813 of proceeds being raised by the Company. The final closing of this private placement was January 10, 2011.

In January 2011, we entered into a series of transactions with accredited investors pursuant to which we sold an aggregate of 800,000 shares of our common stock and five year warrants to purchase up to 800,000 shares of common stock, exercisable at \$2.50 per share, for gross proceeds of \$2,000,000 ("January 2011 Private Placement"). As additional consideration for the purchase of the shares and warrants, the Company issued to the January 2011 investors an option for 120 days to purchase up to 3,200,000 shares of common stock at \$2.50 per share with 100% warrant coverage through the issuance of warrants to purchase up to 3,200,000 shares of common stock at an exercise price of \$2.50 per share. The Company paid cash commissions of \$208,000 and issued five year warrants to purchase up to 169,000 shares of its common stock at an exercise price of \$2.50 per share in connection with the sale of its securities in the January 2011 Private Placement.

In connection with 2009-2010 Private Placement, the Company also entered into certain registration rights agreements. Under the registration rights agreements, the Company is required to file a registration statement covering the resale of the shares of common stock and shares of common stock underlying the warrants by February 9, 2011, and the registration is required to be deemed effective by the SEC on or before the 150<sup>th</sup> calendar day after the filing of such registration statement. In the event these milestones are not met by the Company, the Company is obligated to issue, as liquidated damages on a pro-rata basis to these investors, approximately 290,000 shares for each month, or pro-rated amount if less than one month, the registration is late up to a maximum of approximately 1,450,000 shares. In connection with the January 2011 private placement, we have granted the same demand registration rights with respect to the 800,000 shares of common stock and five year warrants to purchase up to 800,000 shares of common stock. If a registration statement is not filed with the SEC on or before February 9, 2011, or if such registration statement is not deemed effective by the SEC on or before the 150<sup>th</sup> calendar day after the filing of the registration statement, the Company has agreed to make pro rata payments to the investors, as liquidated damages, of a number of shares of Company common stock equal to ten percent of the shares of common stock purchased by the respective investors and issued upon the exercise of the warrants for each 30-day period or pro rata for any portion thereof for which no registration statement has been filed or has not been declared effective by the SEC, as the case may be, provided that such amount shall not exceed five times the liquidated damages amount. There can be no assurance that the Company's registration statement will be effective within 150 days after February 9, 2011.

The sales described above were made pursuant to the exemption from registration contained in to Section 4(2) of the Securities Act of 1933 as privately negotiated, isolated, non-recurring transactions not involving any public offer or solicitation. Each purchaser represented that such purchaser's intention to acquire the shares for investment only and not with a view toward distribution. We requested our stock transfer agent to affix appropriate legends to the stock certificate issued to each purchaser and the transfer agent affixed the appropriate legends. Each purchaser was given adequate access to sufficient information about us to make an informed investment decision. Except as described above, no underwriting discounts, commissions, or finder's fees were involved.
